

**Orbital Sciences Corporation
Launch Systems Group**

QUALITY PROVISIONS STANDARD TEXT CODES	
TITLE	NUMBER 0111.5
MINIMUM QUALITY SYSTEM REQUIREMENTS	DATE 1/14/09
<p>The supplier shall maintain a minimum quality system contained in a quality manual and shall submit the quality manual to Orbital Quality Assurance upon request. The manual shall clearly and effectively describe the deployment of the managing quality system in place at the supplier's facility and the methods used to monitor and report on the system's effectiveness. The manual, at a minimum, shall describe the supplier's processes for; Contract review; Supplier quality management; Control of inspection, measuring and test equipment that ensures calibration traceable to the National Institute of Standards and Technology (NIST) standards; Control of nonconforming products; Control of quality records; Control of manufacturing processes. Orbital reserves the right to conduct surveillance at the supplier's facility to determine that the supplier's quality system is meeting the requirements of the manual. Any perceived or actual approval of supplier's program by Orbital does not constitute acceptance of goods or services or relief of purchase order or subcontract requirements.</p>
