

Orbital Sciences Corporation
Launch Systems Group

QUALITY PROVISIONS STANDARD TEXT CODES	
TITLE	NUMBER 0191.1
RESPONSES TO INDUSTRY ALERT INVESTIGATIONS REQUIRED	DATE 1/14/09
<p>The supplier shall respond to all Orbital requests for information regarding Orbital's investigation into Industry Alerts pertaining to the goods and/or services being supplied per this order. These requests usually require a 30 day response time. However, emergency situations may warrant shorter response times on a case-by-case basis. Industry Alerts are communications received from the government and manufacturing industry regarding issues of possible concern to support product quality and fitness for use. Orbital reviews all Industry Alerts and determines any actions needed to ensure the highest quality of products are used. These actions may include the supplier responding to inquiries regarding if certain items, or certain processes used on items, were delivered to Orbital, or if certain items or processes may have been used in assemblies that have been delivered to Orbital. This information is then used by Orbital's Industry Alert Office to finalize containment plans and item dispositions.</p>
