QUALITY PROVISIONS STANDARD TEXT CODES	
TITLE	NUMBER 0934.2
WAFER LEVEL TRACEABILITY IDENTIFICATION SUBMITTAL REQUIRED	DATE 1/14/09
<p>Supplier shall include the manufacturer's wafer level traceability identification documentation with each item delivered. Each item delivered shall have been assigned by the manufacturer a unique lot code, date code, batch number, or equivalent identification which provides positive traceability of the device die to it's wafer lot and wafer, and all processing steps performed on the die. This documentation shall include the following:</p> <ul style="list-style-type: none"> a. The traceability identification of the applicable wafer lot number; b. The traceability identification of the applicable individual wafer number, and; c. Visible identification applied to the delivered item that shall contain wafer lot number and wafer number marking. If device size (marking area) prohibits wafer lot number and wafer number marking, then the delivered item shall be visibly marked with a unique identification number or symbol which when referred to on the documentation will provide the required wafer level traceability.
